

Safe, Modern Entrepreneurship Education for K-12

A trusted, AI-supported learning platform that turns student ideas into real, shareable Mini Business Plans — built with student privacy, responsible AI, and future-ready learning at the core.

Three K-12 Pathways

Elementary (2-5), Middle (6-8), High School (9-12) — designed to grow with students.

Real Student Outcomes

Mini Business Plan, DISC profile, pitch practice, certificate — students leave with proof of skill.

Educator-First Design

Class codes, progress dashboards, CTE / Perkins V-ready exports, parent share links.

Student Data Privacy & Security

- Operates as a FERPA "school official" under district direction.
- COPPA-strict: Elementary preview requires no account.
- HTTPS / TLS 1.2+, bcrypt password hashing, JWT sessions.
- Browser security headers + rate-limiting on auth.
- U.S.-hosted (Emergent Cloud + MongoDB Atlas).
- We never sell student data — period.
- Districts can request export and deletion at any time.
- Will sign standard SDPC / NDPA Data Privacy Agreements.

Responsible AI in the Classroom

- LemonBot is a **coach, not a ghostwriter** — Socratic prompts only.
- Student chats are not used to train any AI model.
- Daily per-student usage quotas keep AI focused on learning.
- Teachers can disable AI for any class in one click.
- Bilingual (EN / ES) coaching with optional voice replies.

Student Outcomes by End of Program

- Original Mini Business Plan (PDF + share link).
- Verified Certificate with QR-code public verification.
- Pitch-readiness score across a 6-dimension rubric.

Nevada Technology & Digital Citizenship Alignment. Designed to support the Nevada Computer Science & Integrated Technology Standards, classroom digital-citizenship expectations, cybersecurity awareness, responsible AI-supported learning, and Nevada's future-ready learning emphasis. Supports CTE / Perkins V reporting through educator export tools. (*Alignment statements describe how the platform was designed; they are not formal state endorsements or certifications.*)
